What's New on MERL

This edition of MERL contains several new documentation suites and several updated Release 23 Meridian 1 and Option 11 documents. Some of the new documentation suites on this CD-ROM include: Meridian Mail 12, Symposium Call Center Server 1.0, Symposium OPEN IVR 4.0 and Symposium Agent.

In addition to Northern Telecom Publications, this edition of MERL includes a wide variety of task guides, user guides, reference cards and other information products. The four Meridian 1 task guides featured on this CD-ROM cover basic telecom management, network planning, system programming, and fault clearing.

You may also notice that the size of our navigational pages has changed. For this release, we chose a landscape page size to match the proportions of conventional computer screens. We also expanded subject coverage in our Help files to answer more of your questions.
